

RESILIENT NETWORKING FOR ESSENTIAL MISSIONS

**Tyto enables secure, scalable,
and resilient connectivity.**

With decades of experience in network engineering, tactical communications, and secure IT infrastructure, Tyto Athene delivers mission-customized networking solutions with the responsiveness of a boutique provider and the scale of a global integrator—from military bases and command and control (C2) centers to field operations and public safety networks.

In today's mission-critical environments, we provide end-to-end network operations, modernization, and cutting-edge technology solutions that enable seamless communication and real-time intelligence access for warfighters, intelligence analysts, public safety officials, and government agencies.

COMPREHENSIVE NETWORKING CAPABILITIES

- **Network Operations** – Tyto proactively monitors, manages, and secures all network elements including connectivity, systems, and applications, enabling real-time, uninterrupted connectivity for warfighters, federal agencies, disaster response teams, and national security initiatives worldwide.
- **Network Modernization** – Tyto is entrusted by the defense, intelligence, and civilian communities among many other key government agencies to upgrade legacy networks and ensure uninterrupted, high-speed, and secure data and voice communications for greater interoperability and mission performance.
- **Voice Networking & Unified Communications** – Tyto ensures that mission-critical voice networking and unified communications (UC) function without disruption when the mission demands.
- **Emergency Management Systems** – Tyto supports emergency mass notification systems (EMNS), public safety answering points (PSAPs), command and control (C2) centers, and NG 9-1-1, ensuring agencies remain connected and operational when it matters most.
- **Wireless** – Tyto delivers secure, high-performance private 5G, tactical communications, and IoT-enabled networking for mission-ready operations in any environment.

Operation without Interruption

Tyto offers white-glove, tailored solutions while maintaining the global scale and deep expertise required for complex networking solutions. Our ability to operate and modernize without interruption makes us the trusted choice for government agencies seeking to maximize network performance, efficiency, and security.

Contact our team to explore resilient, secure, and scalable networking solutions tailored for mission success.
