DATA TO DOMINANCE

Transforming Information into Actionable Intelligence

For more than 60 years, Tyto Athene has been a trusted technology partner for the defense, intelligence, homeland security, space, and federal civilian communities.

We deliver real-world solutions that turn data into insights—and insights into information dominance. Our mission-driven IT, cybersecurity, cloud, and communication capabilities enable secure, real-time decision-making in the most demanding operational environments.

PERFORMING FOR OUR CUSTOMERS AND OUR COUNTRY

Tyto is more than a service provider. We are a force multiplier, delivering secure, adaptable, and mission-critical technology solutions across government.

Our approach is built on:

- **Information Dominance Solutions** – We ensure secure, resilient, and interoperable mission-critical communications, even in contested and resource-constrained environments.

- **Digital Transformation Expertise** – We modernize legacy networks, enhance cybersecurity, and streamline digital operations to improve government service delivery and resilience.

- **Deep Cybersecurity & Networking Experience** – Our experts leverage decades of experience and intelligent automation to strengthen defenses, accelerate response, and secure mission networks.

- **Operational Agility** – As an innovative and flexible mid-size company, we respond quickly, make data-driven decisions, and rapidly adapt to shifting mission needs.

- **Customer-First Approach** – We work alongside customers at the edge, ensuring hands-on collaboration, accountability, and direct access to senior leadership.

With deep expertise in Networking, Cyber, Mission Enablement, and Digital Transformation, Tyto empowers government operations worldwide to stay ahead of evolving challenges and lead with confidence. Our solutions enable agencies to operate securely, communicate seamlessly, and make data-driven decisions in real time.

Tyto is a trusted partner of the U.S. government, military, intelligence and civilian agencies, delivering secure, scalable, and mission-critical technology solutions that protect the warfighter, enhance national security, and improve the delivery of services to citizens.
